

COORDINATION CHEMISTRY REVIEWS, VOL. 126 (1993)

AUTHOR INDEX

Buslaev, Yu.A. 149	Garnovskii, A.D. 1, 237	Melnik, M. 71
Cabeza, J.A. 319	Hay, B.P. 177	Minkin, V.I. 1
	Holloway, C.E. 71	Nivorozhkin, A.L. 1
Eller, K. 93	Klyagina, A.P. 149	Retta, N. 237
Fernández-Colinas, J.M. 319	Macaskova, L. 71	Sadimenko, A.P. 237

SUBJECT INDEX

-
- | | |
|--|---|
| <p>Bare metal ions
Reactions of monosubstituted alkanes with bare metal ions. An effort toward a more unified picture for the gas-phase chemistry of R-X molecules 93</p> <p>Coordination compounds
Methods for molecular mechanics modeling of coordination compounds 177</p> <p>Copper(I) compounds
Structural aspects of red copper(I) compounds 71</p> <p>Five-membered monoheterocycles
Organometallic complexes of heterocycles. I. σ, π-Complexes of five-membered monoheterocycles 237</p> <p>Heterocycles
Organometallic complexes of heterocycles. I. σ, π-Complexes of five-membered monoheterocycles 237</p> <p>Main group halides
Electronic structure and molecular geometry of main group halides 149</p> <p>Monoheterocycles
Organometallic complexes of heterocycles. I. σ, π-Complexes of five-membered monoheterocycles 237</p> <p>Monosubstituted alkanes
Reactions of monosubstituted alkanes with bare metal ions. An effort toward a more unified picture for the gas-phase chemistry of R-X molecules 93</p> | <p>N-donor ligands
Ruthenium(I) complexes containing bridging N-donor ligands: structure, synthesis and reactivity patterns 319</p> <p>Organometallic complexes
Organometallic complexes of heterocycles. I. σ, π-Complexes of five-membered monoheterocycles 237</p> <p>Red copper(I) compounds
Structural aspects of red copper(I) compounds 71</p> <p>Ruthenium(I) complexes
Ruthenium(I) complexes containing bridging N-donor ligands: structure, synthesis and reactivity patterns 319</p> <p>R-X molecules
Reactions of monosubstituted alkanes with bare metal ions. An effort toward a more unified picture for the gas-phase chemistry of R-X molecules 93</p> <p>Schiff base adducts
Ligand environment and the structure of Schiff base adducts and tetracoordinated metal-chelates 1</p> <p>Tetracoordinated metal-chelates
Ligand environment and the structure of Schiff base adducts and tetracoordinated metal-chelates 1</p> |
